

The Systematic Rental Management Advantage

The most complete rental management solution on the market

SRM is a full function package that effectively manages all your rental operations from counter to customer, with full web integration, complete financials and back-office, and full fleet management from purchasing through maintenance to disposal. Streamlined workflow and improved efficiencies translates directly into benefits that positively impact your bottom line.

Quicker counter operations, superior system performance

Nothing risks revenue like making your customers wait at the counter or on the jobsite. SRM offers reliable system performance and quicker contract generation with fewer keystrokes; greater accuracy, and less wait time. Professional database support and enterprise class system performance has been proven at single deployments of over 500 users and of over 200 locations. Your business is constantly growing and changing, and SRM is designed to grow with you.

Solution designed with input from over 400 rental company clients worldwide

SRM has been built around our intimate practical knowledge of the equipment rental business, utilizing best management features and functionality. The management team at Texada Software have operated and managed with some of North America's leading Rental houses comprising multiple divisions and significant fleets. This unique aspect of Texada Software is unmatched in the industry today and provides our clients with a Partner that truly understands the tools necessary for success.

Our clients are not just buying a product, they are buying the combined knowledge and best practices from the over 400 rental company clients worldwide who have helped shape the application.

We install, implement, and train so you can use SRM most effectively

Texada Software supports you with a professional implementation process. We install, configure and, if necessary, can customize the application to advance your competitiveness. In-person training means your staff is productive day one, and web based follow-ups keep everyone current.

About Texada Software

Texada Software is an independent North American corporation formed by executives with extensive backgrounds in the Equipment Rental Industry. Our applications were specifically designed to provide solutions for the Equipment Rental enterprise, and are scalable to meet the needs of any size operation.

Texada Software has been servicing the North American, Australian and New Zealand Equipment Rental Industry for over 25 years and has embraced a new vision for the future of the industry. Led by experienced management, professional software development and implementation/support teams, Texada Software provides feature-rich solutions that meet the mission critical needs of today's rental organizations.

Our clients enjoy the benefits of enhanced efficiency through better asset utilization, quicker transactions, simplified processes, and comprehensive reporting – which drastically improve business performance with a short payback to the total investment in software.

In a marketplace defined by tough competition, profit pressure, and high customer expectations, it's not enough to have software that simply runs your business

You need software that *improves* your business

Systematic Rental Management

Systematic Rental Management (SRM) integrates every facet of the business into a central nerve-center. A rich feature set lets you operate your business, your way. Quicker service keeps customers satisfied. From the counter through repair to the manager's desk, real-time information keeps your operation running smoothly and efficiently.

Quick and Easy Service

Customers expect quick, easy and consistent service. You need software that enables personnel to find better, faster methods to deliver. Fewer keystrokes, quicker inventory checking, and easy contract preparation means less wait time for your customers. Less wait time means fewer reasons for your customers to switch to your competition.

Real-time Management Reports

Accurate, up-to-the-minute information on revenue, profit and Key Performance Indicators; which of your customers pay promptly and which ones don't. Do you know which customers are most profitable, what locations are most efficient, where to improve the various service offerings? SRM provides insightful information that is guaranteed to improve revenues and enhance your bottom line.

Maximize Utilization, Minimize Downtime

Detailed utilization reporting highlight what's in demand, what's being used frequently and what's sitting in the yard. Downtimes are minimized by pre-scheduling preventative maintenance; functional equipment life increases, profits rise. Software that provides tools to simplify the decision-making process is an absolute requirement for every manager and executive in today's economic climate.

Maximize Efficiency

You want improvements: day-to-day activities require streamlining; invoices need to be generated more efficiently; inventory tracking at a detailed level. Internal processes need to be constantly measured, adjusted, and revitalized. You need software that reduce theft, track progress, and ensure audit and security meet set standards. All these can be accomplished with SRM software.

SRM Functionality Highlights

SRM is the premier asset management system offering features and benefits unmatched in the rental industry. Our feature-rich system has the power to change the way you do business. Your operation will handle more transactions with greater accuracy, with improved network security – and its flexibility will suit your exact requirements.

Counter Operations

- Rapid Contract Entry Process
- Seamless Reservation/Quotation Conversion
- Real Time Availability
- One-Stop Inventory Control Information View
- Effortless Cycle & Smart Billing
- Flexible Product Exchanges
- Enhanced Delivery & Pickup Processing
- Intelligent Rental & Sales Kits

Confidently provide customers with information that is up to the minute. Quicker contract generation with fewer keystrokes means greater accuracy, less wait time, and satisfied customers.

Create deliveries and pickups from the order desk; increase billing accuracy that respects the time the customer actually had the equipment. Post all revenues and utilizations based on defined times for each piece of equipment. Split revenue to appropriate serialized assets, not the last asset exchanged. Smart Cycle Billing processing guaranteed to speed up Accounts Receivable Collections and improve Cash Flow.

Rates, Prices and Discounts

- Flexible Pricing
- Multiple Rate Books
- Group Rates
- Quantity Breaks

Provides flexibility on all aspects of pricing strategy; maximizes revenue generation and improves customer satisfaction. We know that your pricing/rate matrix and strategy is imperative to your success. It is for this reason that there is not a pricing/rate matrix or structure that SRM cannot be configured to handle. It is that flexible.

Inventory Control

- Powerful Inventory Organization
- Serial Number Control
- Meter Calculations
- Bar-coding
- Perpetual Inventory
- In-Transit Branch Transfers
- Detailed Status Code Processing
- Flexible Depreciation Calculation

Determine accurate utilization of serialized assets, in seconds, and keep tight control over asset status. Automated functions schedule routine maintenance, minimize staff time and protect your investment.

Real-time inventory data is easily managed, providing relevant, accurate reports. Losses are limited, allowing for superior organization and streamlined operations. You can mine the data at any time to support your fleet management decision-making needs.

Work Orders

- Internal/External Service & Repairs
- Preventative Maintenance Scheduling
- Customer Equipment Repair Tracking
- Warranty Charging

Your Service & Repair departments run like a well-oiled machines, powered by these profitability enhancing tools. Automated maintenance schedules eliminate chance of routine maintenance being overlooked. Warranty charges can be allocated appropriately between customer, vendor and/or owner. Speedy processing of repairs, accurate repair histories, and efficient management of labor resources control unnecessary expense.

Purchase Orders

- Auto Generation of Purchase Orders
- Transaction History Audit Trails
- Purchase Order Backorder Control for Order Entry & Work Order

The automated Purchase Order functions generate orders to vendors when supply and parts inventories reach minimum levels, eliminating the risk of depleted supplies, unnecessary over-stocking charges and deadline equipment waiting for parts. Detailed transaction histories on all purchases are provided.

Reporting

- Detailed Repair & Revenue Histories
- Management Reporting Subsystem
- Detailed Sales/Rental/Parts Histories
- Regional/Divisional Reporting
- Detailed Sub-ledger Reporting
- Export to Excel, Word, HTML, Screen, PDF, and/or Printer
- Flexible Report Generation & Email Scheduler

Customize and fine tune; take advantage of flexible options to create the exact reports to support important business decisions. Seamless integration with Microsoft Excel allows you to easily manipulate and distribute data. Maximize ROI, Time Utilization, Dollar Utilization on fleet and other critical success factors; uncover problems before they become critical. Discover trends, patterns and correlations, track branch performance and obtain all of the detailed information you need to make your business profitable and keep it growing.

Accounts Receivable

- Credit Rating & Credit Limit Flexibility
- Customers Sorted by Multiple Types & Categories
- Detailed Customer Inquiries
- Call Collection Subsystem

Accounts Receivable functions integrate with advanced customer categorization for improved cash flow monitoring and customer relationship management.

General Ledger & Accounts Payable

- Full Seamless Integration with Inventory
- Open Ended Financial Processes
- Standard Journal Setups
- Custom Statement Layouts & Business Reporting
- Third Party Account Number – Cross Referencing
- Cash Requirements Reporting
- Print Checks

Consolidate all of your accounting functions for superior accuracy in business reporting. Modules are integrated within the SRM system and include many automated functions that save paperwork and provide precise accounting, ultimately contributing to better ROI and improved preparedness when financials are requested.

Seamless Integration Capability

- Accounting Systems
- Customer Relationship Management Applications
- Tax Calculation Systems
- Dealer Management Systems
- Reporting, Dashboard & Business Intelligence Systems
- Web Portal Integration
- Data Warehouse Models
- Hand Held Technologies
- Document Imaging Applications

SRM has been designed to work alongside other best-in-class applications, integrating seamlessly through the open architecture of its relational database. SRM allows you to add additional applications while retaining those that currently function efficiently for you.
